

PII Test Document – BERT Inference

This document contains a variety of realistic text passages with personally identifiable information (PII) embedded throughout. Use it to test the BERT inference pipeline across all supported label categories.

1. Names and Contact Information

The meeting was organized by Sarah Mitchell, who works as a senior compliance officer at Northbridge Financial. Her colleague, James Okafor, prepared the agenda. Please direct all further inquiries to the team lead, Emily Hartwell.

We received a formal complaint from a Mr. Robert Fernandez on behalf of his client, Dr. Angela Chow. Their legal representative is Thomas Blackwood, Esq., who can be reached through the firm.

During the onboarding session, the following participants signed the attendance sheet: Kevin Larsen, Priya Nair, Samuel Okeke, and Mia Johansson.

2. Email Addresses

For billing inquiries, please contact the finance department at billing@northbridge-financial.com. Technical support requests should be sent to support@helpdesk.io or alternatively to james.okafor@northbridge-financial.com.

The system administrator can be reached at admin@secureserver.net. New user registrations are handled by onboarding@platform.co. If you have not received a confirmation, write to no-reply@notifications.service.org.

3. Phone Numbers

The main switchboard is available at +1 (212) 555-0174 during regular business hours. For after-hours emergencies, call the duty manager directly at +44 7911 123456. The regional office in Chicago can be reached at (312) 555-0198.

Customer support is available toll-free at 1-800-555-0122. International callers should dial +49 30 12345678 for the European helpdesk or +61 2 9876 5432 for the Asia-Pacific team.

4. Credit Card Numbers

During the transaction audit, the following card numbers were flagged for review: 4111111111111111 (Visa), 5500005555555559 (Mastercard), and 378282246310005 (American Express). These should be masked immediately in the production database.

The test environment uses dummy card number 4012888888881881 for Stripe integration testing. Do not use real card numbers such as 4000056655665556 in staging environments.

5. Bank Account and Routing Information

Please transfer the outstanding balance to account number 12345678901234 at First National Bank. The IBAN for international transfers is DE89370400440532013000 and the BIC is COBADEFFXXX.

The company payroll account IBAN is GB29NWBK60161331926819. Wire transfers from the US should reference routing number 021000021 and account 9876543210.

6. Passwords and API Keys

The legacy admin portal still uses the default password Winter2024! which must be rotated before the next audit. Several developer accounts were found using Password123 and qwerty1234 — these have been flagged for immediate reset.

The following API key was accidentally committed to the public repository: sk-live-4xKjP9mNqR2wZvL8tYbC3dHe7fUoA1sG. It has since been revoked. The staging key AlzaSyD-9tSrK3jABcDeFgHiJkLmNoPqRsTuVwX should also be rotated.

7. Social Security Numbers

As part of the background check process, the following SSNs were submitted: 123-45-6789 for the primary applicant and 987-65-4321 for the co-applicant. These records are subject to HIPAA and must be stored in the encrypted vault.

The tax filing referenced SSN 456-78-9012 under the name of the listed beneficiary. Please verify this number against the IRS records before proceeding.

8. Passport Numbers

Passport number AB1234567 was submitted as proof of identity by the applicant. The travel document was issued in the United Kingdom and expires in 2029. A second document, passport P12345678, was provided as a backup and appears to be a German federal passport.

Border control flagged passport number C09876543 during the automated screening process. The holder, who presented themselves as a business traveler, was referred to secondary inspection.

9. Realistic Mixed Passages

Dear Mr. Jonathan Wells, thank you for your application. We have processed your details and can confirm that your account ending in 4111111111111111 has been updated. Your new login

credentials have been sent to jonathan.wells@email.com. If you have any questions, please call us at +1 (415) 555-0139.

Internal memo – HR: Please note that the direct deposit for Emily Hartwell (SSN 234-56-7890) has been rerouted to her new account DE89370400440532013000. The change will take effect from the next payroll cycle. Contact hr@company.org for confirmation.

Security alert: User kevin.larsen@corp.net attempted to log in with password Sunsh1ne99 from an unrecognised IP address. The API key sk-prod-9aB2cD3eF4gH5iJ6kL7mN8oP was used in the same session. Immediate review recommended.

From: Thomas Blackwood | thomas.blackwood@lawfirm.co.uk | +44 20 7946 0958. Re: Case file for Robert Fernandez (Passport: XY9876543, SSN: 321-54-9876). Please ensure all documents are encrypted before transmission to billing@lawfirm.co.uk.

10. Edge Cases and Tricky Examples

The username jsmith92 is not PII but the email jsmith92@gmail.com is. Similarly, the word 'password' alone is not sensitive, but Password!Secure42 used as a credential certainly is.

Phone numbers can appear in many formats: 555-867-5309, (555) 867-5309, 5558675309, or +15558675309 — the model should ideally catch all of these.

Names are particularly tricky: 'Apple' is a company but 'Tim Cook' is a full name. 'Jordan' could be a first name or a country. 'Chase' is a bank and a first name. Context matters.

This sentence contains no PII at all. It is simply filler text used to verify that the model does not produce false positives on ordinary language. The quick brown fox jumps over the lazy dog.
